

Mohd Shoaib

Full Stack | Senior React.js Developer | Node.js | React.js | Next.js | JavaScript | TypeScript | 8.8 Years| **Immediate Joiner**
+91-9795359140 | mohdshoaib40@gmail.com | <https://in.linkedin.com/in/mohd-shoaib-a6b68719a> | Lucknow, India

PROFESSIONAL SUMMARY

- Full Stack Software Engineer with 8.8+ years of experience in React.js, JavaScript, TypeScript, Node.js, Express.js, and Next.js, building scalable enterprise applications.
- Strong experience in full-stack application development, including React-based frontend development Node.js/Express.js backend services, REST API development, API integration, reusable components, and data-driven applications.
- Experienced in designing scalable frontend architectures, reusable component libraries, backend API services, interactive dashboards, and high-performance enterprise applications.
- Skilled in developing maintainable applications using React.js, TypeScript, Node.js, Express.js, Redux, REST APIs, and modern JavaScript development practices.
- Experienced in building real-time applications, authentication workflows, analytics dashboards, data visualization solutions, and secure API-driven applications across marketing, healthcare, and enterprise domains.
- Strong understanding of application performance optimization, responsive design, accessibility, reusable architecture, clean code practices, and efficient frontend-backend integration.
- Collaborated with cross-functional teams on API development, cloud deployments, CI/CD workflows, application scalability, and production-ready software delivery.
- Experienced in AI-assisted development practices, Agile/Scrum methodologies, and modern engineering tools to improve developer productivity, application quality, and delivery efficiency.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Redux Toolkit, React Context API, React Router, React Hooks, Custom Hooks, JSX, HTML5, CSS3, SCSS, Responsive Web Design

Backend: Node.js, Express.js, REST API Development, RESTful Services, API Integration, Backend Services, Authentication, WebSocket, Socket.io

State Management: Redux, Redux Toolkit, Redux Saga, Redux Thunk, Zustand, React Context API, Global State Management, Async State Management

UI Development: Material UI, Bootstrap, Bulma, Tailwind CSS, Styled Components, CSS Modules, Storybook, Component-Driven Development, Reusable UI Components, Design Systems, Cross-Browser Compatibility

Data Visualization: Highcharts.js, Chart.js, Real-Time Dashboards, Interactive Analytics UI, Data-Driven User Interfaces

Testing: Vitest, React Testing Library, Jest, Unit Testing, Integration Testing, Component Testing

Performance & Architecture: Micro Frontends, Scalable Application Architecture, Frontend Architecture, Component Libraries, Performance Optimization, Accessibility, Code Splitting, Lazy Loading, Dynamic Imports, Bundle Optimization

Tools & Workflow: Git, GitHub, GitHub Actions, CI/CD, Docker, Jira, Agile Scrum, Postman, NPM, Yarn, Vite

Database : MySQL (Basic)

Generative AI : LLM Integration, Prompt Engineering, AI-Assisted Development

PROFESSIONAL EXPERIENCE

Software Engineer | **Omnicom Media Group** | Dec 2021 – June 2026 | Gurugram, India

GeoLift Research Tool — Location-Based Marketing

- Contributed to the development of a full-stack location-based marketing research platform using React, TypeScript, Node.js, Express.js, and Chart.js, delivering interactive and data-driven insights.
- Developed backend REST APIs and integrated frontend services while building responsive React interfaces using Tailwind CSS for seamless frontend-backend communication and cross-device compatibility.
- Collaborated with frontend, backend, analytics, and product teams to improve application scalability, performance, and data analysis capabilities.

Agile MMM — Marketing Mix Modelling Platform

- Served as a key developer in scaling and rebuilding the Agile MMM platform using React, TypeScript, Node.js, Express.js, and Highcharts.js, supporting global media teams across 10+ markets
- Developed reusable Highcharts.js visualization components and interactive dashboards to present marketing performance insights and simplify analytical reporting workflows.
- Collaborated with backend and analytics teams to build scalable data workflows, improve application performance, and ensure reliable integration between React frontend and Node.js/Express.js services.

Omni UI — Enterprise Component Library

- Spearheaded development of a scalable Web Components library (TypeScript, React.Js, Storybook) adopted across 5+ internal products — used by 10+ developers daily.
- Established component design standards that eliminated UI duplication across teams and reduced new product UI setup time from days to hours.

Sr. Software Engineer | QSS Technosoft Pvt. Ltd | Jun 2021 – Dec 2021 | Noida, India

- Built high-performance React applications with focus on rendering optimization, accessibility, responsive design, and cross-browser compatibility across 3+ client projects
- Applied React performance techniques including React.memo, useCallback, lazy loading, and code splitting, improving page load speed by approximately 35%.
- Collaborated with Node.js backend teams on REST API design, integration, error handling, and frontend-backend communication, delivering 5+ API integrations.

Software Engineer | Laitkor Consultancy Service Pvt. Ltd | Dec 2020 – May 2021 | Lucknow, India

Real-Time Chat Application

- Built a full-stack real-time chat application using React, Node.js, Express.js, and Socket.io, enabling low-latency bidirectional communication.
- Developed REST APIs for user authentication, chat room management, messaging, and message persistence, with seamless integration between frontend and backend services.
- Developed responsive, cross-device interfaces using HTML5, CSS3, and Bootstrap while ensuring reliable real-time application workflows.

Software Engineer | Spinsci Technology LLC | Sep 2016 – Feb 2018 | Nov 2018 – Sep 2020 | Hyderabad, India

Carle Foundation Clinic — Patient Information Management

- Built patient information management modules using React.js and integrated them with secure REST APIs and backend services for real-time clinical data access.
- Developed secure REST API integrations with backend services for patient data handling.

Trinity Health Care — Pharmacy Management System

- Developed a React-based pharmacy management application integrated with an IVR system for real-time access to pharmacy data and improved communication efficiency.
- Built secure API integration between frontend and backend systems to ensure reliable data flow and support healthcare operations.

Agenta Dashboard (TELUS) — Patient Information Management

- Developed a real-time device monitoring dashboard using ReactJS, enabling live visibility into device performance and operational metrics.
- Implemented dynamic log visualization and alert management, reducing troubleshooting time for operations teams.

EDUCATION

-
- Master of Computer Applications (MCA) — Punjab Technical University (2011–2013)
 - Bachelor of Computer Applications (BCA) — Punjab Technical University (2008–2011)
 - GNIIT Diploma in Software Engineering — NIIT

LANGUAGES

-
- English — Fluent (Professional)
 - Hindi — Native
